- Assessment to effectively monitor children's progress accurately and identify delays early

### **Positive impact from Conference**

The conference gave insight to the childminders on how to improve their setting outdoor areas. One childminder has effectively carried out this change as seen in the pictures below:

"The conference presented lots of ideas and different ways of doing things. Using tyres for planting was great. Children can access it more easily especially the younger ones. The normal planters were too high and difficult for several children to play together. Children can play alongside the older children and learn by watching them. Children have helped to plant flowers and coriander seeds. They love to dig and explore the soil. They'll be able to watch the flowers as they grow and learn at the same time" - From CM (Hoe Street)
