STEPS TO PRODUCING THE SCHOOL CENSUS RETURN

The process of producing the School Census can be separated into several steps, some of which might need to be repeated to eliminate validation errors and queries.

GENERATING, VALIDATING, AUTHORISING AND SUBMITTING THE RETURN

1) GENERATING & VALIDATING

All relevant pupil data has been entered and updated in your management information system (MIS) before the school census return is created.

Your MIS will have validation which will help you to identify and correct errors in your data before you generate your return. Follow your MIS support provider instructions to create, validate and authorise the return.

Schools should contact their MIS support provider for specific guidance on generating and validating the return.

2) AUTHORISING

Your MIS will automatically generate a summary of the data in the school census return that will:

- allow you to check that the data is accurate and complete before sending it to the Headteacher; and
- allow the Headteacher authorising the return to check it is accurate and complete before submitting it to the local authority or DfE.

It is strongly recommended that you inspect the MIS summary report carefully, paying particular attention to the sections that might show that some individual pupil data was not entered onto the system before generating the return such as free school meal eligibility, the number of pupils with SEN, data items marked [used for funding] and absence data etc.

The Headteacher is responsible for reviewing and authorising census data before it is submitted.

3) SUBMITTING

Maintained schools including pupil referral units submit data to the Local Authority using COLLECT for further validation and approval before being submitted for DfE authorisation.

The act of submitting the data automatically confirms the return as authorised by the Headteacher.

To use COLLECT to submit your school census data, you will need to log in via DfE Sign-in <https://services.signin.education.gov.uk>. Contact your school approver, if you want to request a DfE sign-in username or password so you can access COLLECT, or 'school census' is not on the list of collections you can see in COLLECT.

All school census COLLECT errors are to be corrected. All queries checked and either amended (if there is an issue); or a notepad explanation is provided in the 'return level notes' section of COLLECT. A DfE list of acceptable notepad entries is at www.gov.uk/guidance/complete-the-school-census/check-your-data (section 'Adding explanatory notes for queries').

If the DfE has any queries about your return or any of the notes added, they may also add a note to the 'return level notes' section of COLLECT. It is worth checking back to make sure your return is authorised.

More DfE guidance on submitting the return can be found at www.gov.uk/guidance/complete-the-school-census/submit-your-data; and checking at www.gov.uk/guidance/complete-the-school-census/check-your-data

'Dry Run' & Testing

Schools should take the opportunity to do a 'dry run' of their school census return. The purpose of a dry run is to provide details about any corrections that need to be made to your data to make it acceptable for inclusion. So that you are aware of any potential issues, it is advisable to do this as early as possible, even if you know that your data has not yet been fully prepared or checked. Contact your management information system (MIS) Support Provider for any procedural guidance to facilitate a dry run.

COLLECT Familiarisation

A 'beta' release of the School Census live COLLECT blade will be available to schools week commencing 12 September 2022. This will remain available until 4pm on Friday 30 September at which point the blade will be removed and cleared out in advance of the start of the live collection on Thursday 6 October.

COLLECT familiarisation will take place on the same system as the live collection and, therefore, can be accessed by logging into [COLLECT](#).

The DfE would strongly recommend that, if possible, all schools take the chance to load a file output from their management information system (MIS) into COLLECT during the familiarisation process. This will allow schools to check that all the required data is being output correctly from their MIS into the autumn census return and whether any validation errors or queries are generated against their data when loaded into COLLECT which need to be resolved before the collection goes live.
