

OFFICIAL

Severe Adverse Weather & Health Plan for London Borough of Waltham Forest

Purpose of the Severe Adverse Weather & Health Plan (SAWHP)

The purpose of this Severe Weather Plan is to reduce illness and death during either severe hot or cold weather by raising public awareness and by prompting Council services to take steps to reduce the impact of extreme cold & heat on our most vulnerable residents.

Version 1.2

June 2024

Developed by Public Health
on behalf of the London Borough of Waltham Forest

This version has been approved by:

Joe McDonnell
Director of Public Health
London Borough of Waltham Forest

SECTION 1: AUTHORITY AND APPROVAL

1.1 PLAN DEVELOPMENT AND OWNERSHIP

- **Lead development officer:** Ed Stagg, Public Health Strategist (Health Protection/Civil Protection)
- **Ownership in draft:** Public Health
- **Ownership on completion:** Director of Public Health

1.2 PLAN APPROVAL

This plan has been submitted to, scrutinised by and approved by the Director of Public Health, and agreed as fit for purpose.

This plan was approved by Director of Public Health on:

Date:

1.3 PARTICIPATING SERVICES

Director of Public Health	Families Directorate
Adult Social Care/Children Social Care	Facilities Management/ Health and Safety Team
Corporate Communications	Schools/Educational Settings
Human Resources	Commissioning
Events	Other Council services as necessary
Housing (inc. rough sleeping team)	

1.4 DOCUMENT CONTROL AND DISTRIBUTION

This document is marked: OFFICIAL.

The Public Health responsible officer(s) will ensure that an up-to-date hard copy of the plan is available in the Borough Emergency Control Centre. Council services with responsibilities under this plan will receive an electronic copy.

1.5 REVIEW AND AMENDMENTS

This plan will be reviewed no less than every 3 years, or where:

- the Council undergoes significant restructure
- in the light of revised guidance
- at the order of the Director of Public Health

OFFICIAL

All major reviews will be carried out by Public Health, consulting with key Council services, with final agreement by the Director of Public Health. Minor amendments and versions of this plan will be approved by Public Health responsible officer(s).

The document version is recorded on the front cover page and in the header of each page, along with date of issue.

1.6 VERSION CONTROL / HISTORY

1	June 2023	Merged hot & cold weather plans. Cold weather info to be inputted in November 2023.	Edward Stagg
1.1	November 2023	Added in cold weather info	Edward Stagg
1.2	June 2024	Updated hot weather sections	Edward Stagg

OFFICIAL

SECTION 2: SUMMARY AND PURPOSE OF PLAN

2.1 PLAN AIM

To ensure that the London Borough of Waltham Forest is prepared for and is able to respond effectively to severe hot & cold weather.

2.2 OBJECTIVES

This plan outlines how the Council will:

- minimise the impact of severe hot & cold weather on vulnerable residents known to Council services
- minimise the impact of a severe hot & cold weather on staff and ‘critical services’
- warn and inform residents before and during severe hot & cold weather
- minimise the impact of severe hot & cold weather on vulnerable residents not known to Council services

2.3 SCOPE

This plan is a guide to actions to be taken before and during a period of severe hot or cold weather.

It is not a Business Continuity response plan. Each service retains responsibility for preparing for disruption and documenting these arrangements in their Business Continuity Plan.

2.4 TRIGGERS

Actions in this plan are linked to the Alert Levels of the new Met Office Weather-Health alert system. This email alert system is run for the summer & winter months consists of the following Alert Levels:

Green (preparedness) <i>Summer: 1 June – 30 September</i> <i>Winter: 1 November – 30 March</i>	No alert will be issued as the conditions are likely to have minimal impact and health; business as usual and summer/winter planning and preparedness activities. Council departments familiarise themselves with their action card and undertake preparedness actions
Yellow (response)	These alerts cover a range of situations. Yellow alerts may be issued during periods of heat/cold which would be unlikely to impact most people but could impact those who are particularly vulnerable.

OFFICIAL

	Council departments undertake Yellow response actions.
Amber (enhanced response)	<p>An amber alert indicates that weather impacts are likely to be felt across the whole health service, with potential for the whole population to be at risk. Non-health sectors may also start to observe impacts and amore significant coordinated response may be required.</p> <p>Council departments undertake Amber response actions.</p>
Red (emergency response)	<p>A red alert indicates significant risk to life for even the healthy population.</p> <p>Council departments undertake Red response actions.</p>

2.5 NOTIFICATION

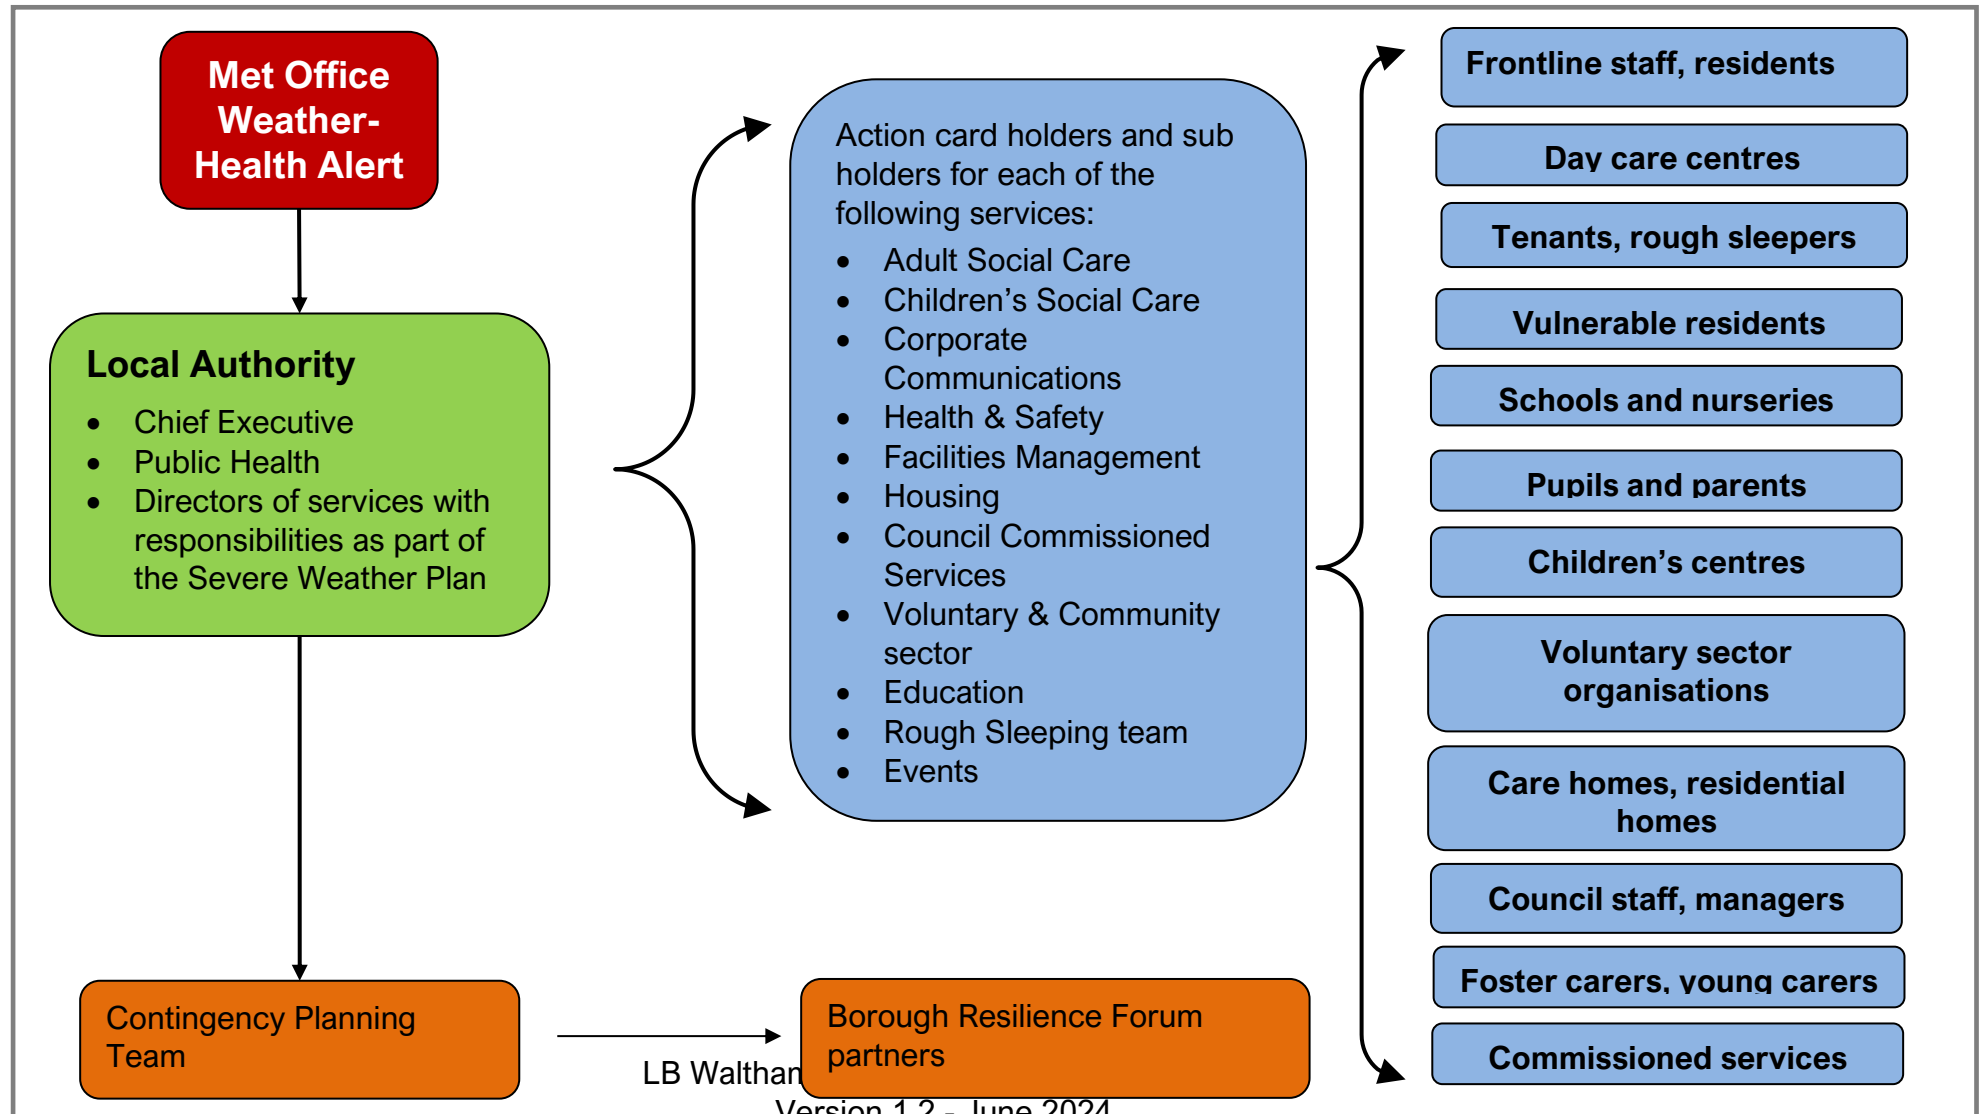

Managers responsible for actions under the Severe Weather Plan need to receive the Weather-Health alert directly to ensure a timely response. See Appendix 1 to find out how to register, to see which Council officers are currently signed up and to see an example of an email alert.

2.6 MONITORING AND INFORMATION CASCADE

Following an increase in the Alert Level, the Public Health responsible officer(s) will contact key Council services and seek assurances that appropriate actions have been taken.

OFFICIAL

The Public Health responsible officer(s) will also ensure that senior officers within the Council are kept updated. The diagram below shows who the Alert Level notifications needs to be cascaded to:

OFFICIAL

Figure 1: Cascade of Weather-Health Alerts

2.7 ACTIVATION

Once we are at Amber level, the Director of Public Health or nominated representative from the Public Health team will lead the Council response acting as the ‘Council Silver’ supported by the Public Health responsible officer(s). The Director of Public Health may also wish to take control of Council response at Yellow if level of risk is perceived to be high or there is more than 80% likelihood severe weather (Amber) will be forecast. An initial “Activation” team meeting will be scheduled by the Public Health responsible officer(s), with compulsory attendance from the Severe Weather Response Team, including the Director of Public Health and relevant Public Health colleagues, Director of Neighbourhoods, Corporate Communications and Contingency Planning team colleagues to begin coordinating response and confirmation of appropriate actions. Where required i.e. increased length of forecasted severe weather, this team will meet every few days as instructed by the Director of Public Health. Where required, additional colleagues may be invited to meetings i.e. lead/deputy action card holders.

The diagram below shows the escalation level and meetings required:

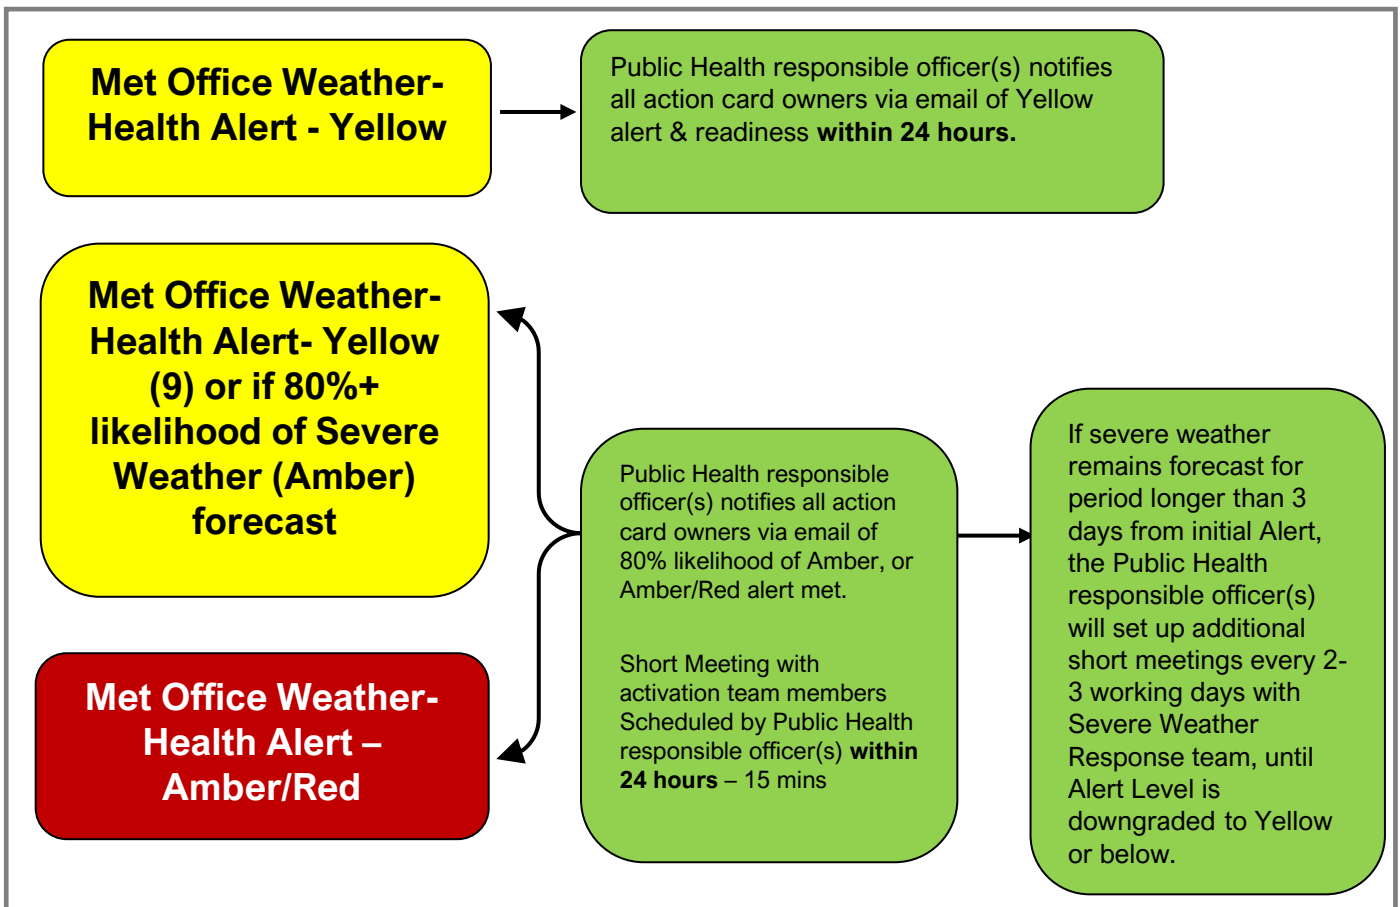

Figure 2: Escalation level and meetings required

OFFICIAL

2.8 STAND-DOWN

The issuing of a lower Alert Level by the Met Office will prompt a reduction in the Council response. This will also be confirmed via email by the Public Health responsible officer(s).

OFFICIAL

SECTION 3: MANAGING OUR SEVERE WEATHER RESPONSE

3.1 CORPORATE EMERGENCY MANAGEMENT PLAN (CEMP)

The Council's *Corporate Emergency Management Plan* provides the framework for our response to a severe weather event even though a Major Incident is unlikely to be declared simply because it is exceptionally warm or cold. Useful components of the CEMP can be utilised as required.

Available from: [Waltham Forest](#) Hub (LBWF staff only)

3.2 DIRECTOR OF PUBLIC HEALTH (DPH)

The Director of Public Health is the lead officer in the Council for health. Given the serious threat to health posed by a severe weather event, the Director of Public Health will take the lead during our severe weather response and in effect, will act as the Council's 'Council Silver' (see CEMP for further discussion of this role).

The Director of Public Health will ensure that appropriate advice is communicated to the public and will seek assurances that Council services and local health and social care providers are taking appropriate actions to minimise the impact.

3.3 DELEGATED RESPONSIBILITIES

Specific Council services will need to take appropriate actions before and during a severe weather event. These actions are described below, together with details of the officers responsible. For clarity there is an 'Action Card' for each service at the back of this document (see: Appendices 7 & 8).

The DPH will seek assurance that these actions have been carried out properly.

3.4 PUBLIC HEALTH

The Public Health responsible officer(s) will ensure that appropriate Council staff receive the Weather-Health Watch emails and will support the assurance process for the Director of Public Health. The following resources will support the Council response:

3.4.1 Borough Emergency Control Centre (BECC)

Depending on the severity of the weather event, the Director of Public Health may want to meet with services that have responsibilities under the plan to be assured that appropriate actions are being taken. The BECC will be made available for this purpose. This meeting usually takes place remotely however.

OFFICIAL

3.4.2 Situation reporting

During a severe weather event, the Public Health responsible officer(s) may be required to report to the regional resilience structures on any impacts and the actions taken by the Borough. These reports will also give the Director of Public Health an idea of how well the Council is implementing this plan. More information about situation reports can be found in Appendix 6.

3.4.3 Working with local responders

The Public Health responsible officer(s) will confirm via the council's Contingency Planning Team that local responders - particularly from the Health sector (NHS, CCG, Adult Social Care, Children's Social Care etc.) are aware of any increase in the Alert Level and will seek assurances that they are taking appropriate actions to minimise the impact of a severe weather event.

3.5 DUTY COUNCIL SILVER

As the emergency services are unlikely to declare a Major Incident for severe hot or cold weather, the Duty Council Silver will not be required to coordinate the response; this role will be performed by the DPH. If the DPH is the Duty Council Silver when this plan is activated, the Contingency Planning team will ask another Chief Officer to cover the rest of the on-call week. The Public Health responsible officer(s) will ensure that the duty Council Silver is informed of the impacts of the cold weather and the Council's response to it.

OFFICIAL

SECTION 4: RESPONSE TASKS

The focus of the Council's Severe Adverse Weather & Health Plan is the relatively straightforward task of communicating the alerts to those who need to know and providing advice. This includes:

- the public
- key Council services
- care providers
- schools and children's centres
- the community and voluntary sector
- partners in the Borough Resilience Forum (BRF)

The hot and cold weather communications plans are attached in Appendix 2. All teams who have action cards should familiarise themselves with the key communications relevant to their service users in response to weather-health alerts and assure themselves that their service users are aware of key public health messages.

4.1 PERSONALISED SUPPORT TO THE VULNERABLE

Staff who provide services to residents in their homes will be asked to consider what support could be given to service users to reduce the impact of severe hot or cold weather, for example the provision of electric fans or blankets. Adult Social Care, Children's Social Care and Commissioning will decide if such support is appropriate and make any arrangements for this if necessary.

4.2 IDENTIFICATION OF THE VULNERABLE BY MULTI-AGENCY PARTNERS

Some residents vulnerable to the impact of severe hot or cold weather will not be known to the Council but may be known to other agencies working in the Borough. During a severe weather incident, the Public Health responsible officer(s) will ask partner agencies to provide details of any vulnerable people they can identify. These details can then be shared with Adult Social Care and Children's Social Care for cross-referencing against Council records to filter out duplicates (i.e. those residents who are already known to Council services). Adult Social Care, Children's Social Care and Commissioning will then decide what support is appropriate for these additional vulnerable people.

4.3 IDENTIFICATION OF THE VULNERABLE BY 'FRONTLINE' COUNCIL SERVICES

Council services that work on our streets and engage directly with the public are well-placed to identify those residents who may be vulnerable to the effects of a severe weather incident but who are not known to Council services for example, a frail elderly resident living alone in a south-facing flat. During a prolonged period of severe hot or cold weather, the Director of Public Health may ask for these 'frontline'

OFFICIAL

services to keep an eye out for residents that may struggle to cope with the weather and to pass any relevant information to Adult Social Care, Children's Social Care and Commissioning colleagues.

4.4 MONITORING OF HEAT-RELATED ILLNESS AND DEATHS

During a prolonged period of hot or cold weather, the Director of Public Health will want to know what impact it is having on residents. The following datasets are available via UK Health Security Agency (UKHSA) and give an idea of severe weather-related illness at the national level:

- hot or cold weather-related calls to NHS 111
- hot or cold weather-related emergency department attendances
- hot or cold weather-related GP consultations

UKHSA also monitors mortality rates across England and Wales to determine whether more people are dying than we would normally expect i.e. excess deaths. During prolonged severe weather, action card holders for Adult Social Care, Children's Social Care and Council Commissioned Services should also monitor hot or cold weather-related illness and deaths among service users and report this to the commissioning lead and/or the public health responsible officer.

4.5 'BUSINESS AS USUAL' PLANS AND PROCEDURES

During our response, a number of the Council's 'business as usual' plans and procedures will have an important role in reducing the impact of severe weather on residents. The Director of Public Health will seek assurances that these are working effectively. These arrangements are summarised below:

4.5.1 Supporting NHS Acute Services during winter pressures

NHS services can experience severe pressures during the winter as a result of the seasonal increase in influenza cases, outbreaks of norovirus ('winter vomiting') and the impact of lower temperatures and winter weather on the elderly and those with existing health problems. To minimise these pressures, the local health and social care systems work closely together to reduce the burden on acute care through timely and safe hospital discharge.

Responsible officer: Head of Service, Assessment and Care Management.

4.5.2 Winter Service Plan

The Highways Service has arrangements to reduce the impact of ice and snow on the transport network. The borough's main roads are the focus of these arrangements together with key pedestrian routes in 11 identified shopping areas and transport hubs across Waltham Forest. The Highways Service receives detailed daily weather reports and if low road surface temperatures are predicted and frost and ice is likely then a decision is made to carry out pre-cautionary gritting in these

OFFICIAL

areas. Daily updates are sent to senior Council Officers on any actions taken as part of the Winter Service Plan. Following exceptional snow fall, the Highways Service also has access to 2 snow plough attachments to clear snow from the roads. The Neighbourhoods team are responsible for clearing pedestrian routes when heavy snow fall has occurred. The Winter Service Plan is not linked to the Cold Weather Alerts but officers from the Highways Service are registered to receive them.

Responsible officer: Public Lighting, Drainage & Responsive Maintenance Manager.

4.5.3 Severe Weather Emergency Protocol (SWEP)

The Housing Solutions Service (Rough Sleeping) has arrangements to ensure that no one dies on the streets due to severe weather. The SWEP is triggered by the GLA if a weather forecast of three days or more of sub-zero temperatures. These arrangements rely on national media sources for these forecasts – TV, radio and newspapers.

In Summer, SWEP is triggered when a Yellow Heat-Health Alert is received however, at this stage accommodation is not provided – instead, cool rooms around the borough and sunscreen, water bottles etc are provided. After an Amber or Red Heat-Health Alert, the councils Rough Sleeping team will provide a cool space which will be available overnight for any period the weather is over 35 degrees.

Responsible officers: Divisional Director- Housing Solutions, Rough Sleeping Coordinator

4.5.4 Fuel Poverty Strategy

The Strategic Housing team in the Families Directorate is responsible for fuel poverty work. The team is working to tackle fuel poverty in privately rented and owner-occupied properties, as well as in social housing. Key initiatives include:

- **Fuel Poverty Strategy**
- **HEET** - LBWF contracts HEET, a local not-for-profit organisation who provide fuel poverty services to Waltham Forest households who receive certain benefits, or who are aged over 60
- **Older People and Fuel Poverty Campaign**

4.5.5 Seasonal Flu & Covid-19 Vaccination Programmes

The Council's Public Health team together with NHS England, Waltham Forest North East London Integrated Care Board (NEL ICB) and UKHSA undertake an influenza immunisation programme every year starting in September and continuing over the winter months and a Covid-19 booster immunisation programme every Spring and Autumn. The programmes are focused on those groups most at risk from the effects of flu and Covid-19. Frontline health and social care staff are also encouraged to take up the offer of a vaccination from their employer. The annual immunisation

OFFICIAL

programme plays a key role in reducing unplanned hospital admissions and pressures on the Emergency Department at Whipps Cross Hospital.

4.5.6 Community Living Rooms

Community Living Rooms are a collection of community and Council settings across the borough that will be open to the community throughout the year. There are three types of Winter Space: Community Living Rooms, Community Kitchens and Community Desks. The settings that are part of the Winter Spaces Network are featured on the Winter Spaces Directory. The Winter Spaces Directory is a simple tool residents can use to find out the locations of Winter Spaces across the borough and the ones closest to their home. The Directory has all information needed on each Winter Space, such as opening hours, facilities and accessibility. More information on the Community Living Rooms Network, including access to the Directory, is available [here](#).

APPENDICES

APPENDIX 1: SEVERE WEATHER ALERTS

UKHSA’s Met Office Weather-Health Alerts

The council’s severe weather plan is activated by the Met Office Weather-Health Alert System. The Weather-Health Alert Service is designed to help healthcare professionals manage through periods of extreme temperature. The service acts as an early warning system forewarning of periods of high or low temperatures, which may affect the health of the UK public.

The heat-health alert (HHA) operates from 1 June to 30 September and the cold-health alert (CHA) operates from 1 November to 30 March. An out of season alert may still be issued if impacts from adverse weather (hot or cold) on health are expected.

Both systems are based on the Met Office forecasts and data. Depending on the level of alert, a response will be triggered to communicate the risk to the NHS England, government, and public health system.

The alerts will be given a colour (yellow, amber or red) based on the combination of the impact the weather conditions could have, and the likelihood of those impacts being realised. These assessments are made in conjunction with the Met Office when adverse weather conditions are indicated within the forecast. The new impact-based HHAs will contain:

- headline weather conditions expected in the coming days
- an outline of what impacts might be expected
- brief overview of regional impact assessment
- links to additional information, advice and guidance

Figure 2. Impact and likelihood risk matrix

OFFICIAL

Action card holders and deputies named in this plan will be signed up to receive these email alerts automatically however, the Public Health responsible officer(s) will also circulate these to all action card holders and deputies when there is a change in alert level.

If you are not receiving these alerts, make sure you sign up [here](#).

For more information about these alerts, click [here](#).

Met Office National Severe Weather Warning Service (NSWWS)

The Met Office National Severe Weather Warning Service (NSWWS) warns of the impacts caused by severe weather. Met Office weather warnings include a level of impact that the forecast weather is expected to bring and the likelihood of those impacts occurring.

These warnings are issued to:

- The public, to prompt consideration of actions they may need to take
- Emergency responders, to trigger their plans to protect the public from impacts in advance of an event, and to help them recover from any impacts after the event.

You can read more about the NSWWS and an indication of the types of impacts that could occur for each of the weather types [here](#).

Waltham Forest Weather-Health Alert Distribution List 2024/25

The following table lists all colleagues who will receive UKHSA's Met Office Weather-Health Watch alerts in 2024/25. This list includes all action card holders and deputy action card holders listed in Appendix 9 and also Borough Resilience Forum partners. If you any of your LBWF colleagues are signed up to receive the Weather-Health Watch alerts and are not on this list, please update Ed Stagg (Edward.stagg@walthamforest.gov.uk) with this information.

APPENDIX 2: PUBLIC HEALTH COMMUNICATION MESSAGES & COMMUNICATIONS PLAN

Key public health messages and resources

This section summarises the key public health messages for staff and residents in preparation for and in response to severe hot & cold weather. You can use these messages to form the public health advice you provide to residents and staff - as per the responsibilities in in your action cards.

Council/resident focused public health messages related to hot weather will also be hosted on: <https://www.walthamforest.gov.uk/health-and-wellbeing/stay-well/stay-well-heat>

Council/resident focused public health messages related to cold weather will be hosted on: <https://www.walthamforest.gov.uk/health-and-wellbeing/stay-well/winter-wellness-stay-healthy-winter>

Summary of key public health messages

HOT WEATHER

Stay out of the heat:

- Keep out of the sun between 11am and 3pm
- If you have to go out in the heat, walk in the shade, apply sunscreen of at least SPF 30 and 4 or 5 star ultraviolet A (UVA) protection and wear a hat and light scarf. Access cool spaces across the borough (details about these can be found in Appendix 5)
- Avoid extreme physical exertion. If you can't avoid strenuous outdoor activity, keep it for cooler parts of the day such as early morning or evening
- Wear light, loose-fitting cotton clothes

Cool yourself down:

- Move to a cooler place such as a room with air conditioning or somewhere in the shade
- Remove all unnecessary clothing like a jacket or socks
- Have plenty of cold drinks, and avoid excess alcohol, caffeine and hot drinks
- Eat cold foods, particularly salads and fruit with a high-water content e.g. watermelon, strawberries, melon, peach, pineapple, apple, ice lollies etc.
- Take a cool shower, bath or body wash
- Sprinkle water over the skin or clothing, or keep a damp cloth on the back of your neck

Keep your environment cool:

- Keeping your living space cool is especially important for infants, the elderly or those with chronic health conditions or who can't look after themselves
- Place a thermometer in your main living room and bedroom to keep a check on the temperature
- Keep windows that are exposed to the sun closed during the day, and open windows at night when the temperature has dropped

OFFICIAL

- Close curtains that receive morning or afternoon sun, however, care should be taken with metal blinds and dark curtains, as these can absorb heat – consider replacing or putting reflective material in-between them and the window space
- Turn off non-essential lights and electrical equipment – they generate heat
- Keep indoor plants and bowls of water in the house as evaporation helps cool the air
- If possible, move into a cooler room, especially for sleeping
- Electric fans may provide some relief where temperatures are below 35°C. Do not use electric fans in rooms where someone has a suspected/confirmed case of COVID-19 as this may help spread COVID-19 droplets in the air

Look out for others:

- Keep an eye on people who live alone, elderly, ill or very young people and make sure they are able to keep cool
- Ensure that babies, children, elderly people or pets are not left alone in stationary cars
- Check on elderly or sick neighbours, family or friends every day during a heatwave
- Be alert and call a doctor or social services if someone is unwell or further help is needed
- Look out for children in prams or pushchairs in hot weather; keep them in the shade, remove excess clothing, ensure there is adequate air flow and check regularly to ensure they are not overheated

If you have a health problem:

- Keep medicines below 25 °C or in the refrigerator (read the storage instructions on the packaging)
- Seek medical advice if you are suffering from a chronic medical condition or taking multiple medications

If you or others feel unwell:

- Try to get help if you feel dizzy, weak, anxious or have intense thirst and headache; move to a cool place as soon as possible and measure your body temperature
- Drink some water or fruit juice to rehydrate
- Rest immediately in a cool place if you have painful muscular spasms (particularly in the legs, arms or abdomen, in many cases after sustained exercise during very hot weather), and drink oral rehydration solutions containing electrolytes
- Medical attention is needed if heat cramps last more than one hour
- Consult your doctor if you feel unusual symptoms or if symptoms persist

When to call 999

Call 999 if you or someone else has any signs of heatstroke, such as:

- Feeling unwell after 30 minutes of resting in a cool place and drinking plenty of water
- Not sweating even while feeling too hot
- A high temperature of 40°C or above
- Fast breathing or shortness of breath

OFFICIAL

- Feeling confused
- A fit (seizure)
- Loss of consciousness
- Not being responsive

Heatstroke can be very serious if not treated quickly. Put the person in the [recovery position](#) if they lose consciousness while you're waiting for help.

If a person has improved after 30 minutes of resting in a cool place and drinking plenty of water but you still have concerns about them, contact your GP or NHS 111 for advice.

COLD WEATHER

Keep your home warm:

- try to heat rooms you spend a lot of time in, such as the living room or bedroom, to at least 18°C
- try to reduce draughts; you can fit draft excluders around doors cheaply
- keep your bedroom windows closed at night
- wear several layers of thinner clothing; this could keep you warmer than one thicker layer

Seek financial support:

- People in financial difficulty may find it more difficult to heat their homes sufficiently. This increases the risk of becoming unwell due to cold exposure. There are grants, benefits and sources of advice available to help you [make your home more energy efficient](#), [improve your heating](#) or help manage energy bills. There are also support measures in place to help with the cost of living, [especially for those on low incomes](#). For example, if you claim certain benefits or tax credits, you may be eligible for an extra payment from the government to help with the cost of living. The government has published [energy saving tips](#) to help save money on bills.
- Visit the [Waltham Forest Council cost of living support](#) website for local information and help.

Look after yourself and others:

- Get vaccinated to help reduce your risk of getting respiratory illnesses such as flu and Covid-19 during the winter. This is particularly important if you have certain long-term health conditions that mean you are more vulnerable to the effects of cold weather. You can check your eligibility for a [flu vaccination](#) or [COVID-19 booster](#) online. Contact your pharmacist or GP or visit the NHS England website to learn more.
- Treat minor winter ailments like colds or sore throats promptly. NHS England provides information on steps you can take to manage [colds](#) or [sore throats](#) yourself, and when it may be appropriate to visit your local pharmacist for further advice and treatment.
- If you are worried about your health or feeling down, contact your local pharmacist, NHS 111 or your GP, who will all be able to offer advice and support. In an emergency dial 999.

Other people around you, particularly older neighbours, family friends and neighbours, may need extra support during cold weather. To support others you can:

OFFICIAL

- keep in touch with them and ask whether they are feeling unwell, or whether they need any practical help
- if bad weather is [forecast](#), see if they need any help stocking up on food and medication
- if you are worried about someone else's health, contact your local pharmacist, your GP or NHS 111, who will all be able to offer advice and support
- if you think they may have [hypothermia](#), contact NHS 111 for further assessment, and in an emergency dial 999; typical signs that someone may be suffering from hypothermia include shivering, slow breathing, tiredness or confusion, and pale, cold skin.

When you are indoors:

- Try not to sit still for more than an hour or so
- If you find it difficult to move about, stretching your arms and legs can also help keep you warm
- If you have visitors, it can help stop the spread of germs to [ventilate the room](#) for a few minutes before and after they arrive; you might be more comfortable leaving the window open during their visit, if it's not too cold.

When out and about, wear shoes with good grip to avoid slips and falls on slippery or icy surfaces.

If bad weather is [forecast](#), plan ahead and check that you've got enough medication and food in case it's harder to leave the house. If you cannot leave the house, try to identify others who might be able to help pick up food and medication on your behalf. The [NHS CARE Volunteer Responders scheme](#) may be able to provide help for those who are eligible for support.

Prepare your home:

Longer term improvements to your house can greatly improve your comfort but can be expensive. You can [check your energy performance certificate \(EPC\)](#) if available for potential improvements and consider speaking to a professional depending on the kinds of changes that are suggested. Depending on what you can afford, options may include:

- regular servicing of your heating appliances can keep them working efficiently and for longer, saving you money
- insulation for water pipes to prevent them from freezing in cold weather
- loft insulation
- internal, cavity or external wall insulation
- double (or triple) window glazing

Targeted public health hot weather messages for key groups

Summary of suggested hot weather content for social media

HOT WEATHER

The following public health messages can be used to notify staff and residents about how to mitigate the impacts of hot weather via social media. Further information about this can be found in the UKHSA Hot Weather Communications Toolkit for 2022 on page 37.

- Look out for older people and others who may find it more difficult to stay cool and hydrated in hot weather. Stay #WeatherAware.
 - It is important to check that older friends, family and neighbours are coping during the hot weather. Keep in touch over the phone and follow the guidance on how to safely care for others #BeattheHeat
 - Drink plenty of fluids and avoid excess alcohol during the hot weather. Stay #WeatherAware
 - A cool living space is especially important for infants, older people or those with long-term health conditions #BeattheHeat
 - Keep indoor plants and bowls of water in the house during hot weather: evaporation helps cool the air. #BeattheHeat
 - Avoid extreme physical exertion during the hot weather. If you can't avoid strenuous outdoor activity, keep it for cooler parts of the day e.g., early morning or evening. #BeattheHeat
 - The best thing to do in the hot weather is stay out of the direct sun, especially between 11am and 3pm as UV rays are strongest during these hours. #BeattheHeat
 - Stay #WeatherAware. Don't leave babies, children, older people or vulnerable people or pets alone in stationary cars in hot weather
 - If going out in the hot weather, walk in the shade, apply sunscreen, wear a hat and light, loose cotton clothes #BeattheHeat.
 - Stay #WeatherAware: If you or others feel unwell, get dizzy, feel weak, anxious or have intense thirst, move to a cool place, rehydrate and cool your body down.
 - Rest immediately in a cool place if you have painful muscular spasms and drink plenty of cool drinks. Seek medical attention if you feel unusual symptoms or if symptoms persist. Stay #WeatherAware #BeattheHeat
-
- Useful twitter handles: @MetOffice, @UKHSA, @OHID, @LGAcomms, @NHSEngland, @NHSChoices.
 - Agreed hashtags to be included here: #heatwave #LBWF

APPENDIX 3: GROUPS MOST VULNERABLE TO EXTREME HOT & COLD WEATHER

Who is most at risk?

Severe hot or cold weather can impact anyone, but some people are at a greater risk of serious harm.

Key groups at risk from hot weather

Everyone is at risk from the health consequences of heat, but there are certain factors that increase an individual's risk during a heatwave. These include:

- older people aged over 65 years
- babies and young children under the age of 5 years
- people with underlying health conditions, particularly heart problems, breathing problems, dementia, diabetes, kidney disease, Parkinson's disease or mobility problems
- people on certain medications
- people with serious mental health problems
- people who are already ill and dehydrated (for example from diarrhoea and vomiting)
- people who experience alcohol or drug dependence
- people who are physically active and spend a lot of time outside such as runners, cyclists and walkers
- people who work in jobs that require manual labour or extensive time outside
- people experiencing homelessness, including rough sleepers and those who are unable to make adaptations to their living accommodation such as sofa surfers or those living in hostels
- people who live alone and may be unable to care for themselves

Key groups at risk from cold weather

Cold-related ill-health is a complex issue involving many factors. However, there are a variety of health risks that can be brought on or exacerbated by cold weather. The key groups that are particularly at risk in the event of cold weather are:

- older people (aged 65 years and over)
- people with long-term health conditions such as cardiovascular or respiratory disease, or a mental health condition
- pregnant women
- young children (particularly those aged 5 and under)
- people with learning disabilities
- people at risk of falls
- people who live alone and may be unable to care for themselves
- people who are housebound or have low mobility
- people living in deprived circumstances

APPENDIX 4: HEALTH IMPACTS OF HOT & COLD WEATHER

Health Impacts of Hot Weather

The main causes of illness and death during a heatwave are **respiratory and cardiovascular diseases**.

Additionally, there are specific heat-related illnesses including:

- Heat cramps – caused by dehydration and loss of electrolytes, including after exercise
- Heat rash – small, red, itchy papules all over the body
- Heat oedema – swelling, particularly in the ankles, due to dilation of blood vessels and retention of fluid
- Heat syncope – dizziness and fainting, due to dehydration and vasodilation, worsened by cardiovascular disease and certain medications
- Heat exhaustion which occurs as a result of dehydration, with non-specific symptoms such as malaise, vomiting and circulatory collapse. It occurs when the core body temperature is between 37°C and 40°C. Left untreated, heat exhaustion may evolve into heatstroke
- Heatstroke - a more severe illness in which the body's thermoregulation mechanism fails. Heatstroke is a medical emergency, with symptoms of confusion, disorientation, convulsions, unconsciousness and hot dry skin. It occurs when core body temperature exceeds 40°C for over 45 minutes and can result in cell death, organ failure, brain damage or death. Heat stroke can be either classical or exertional (heat stroke that results from strenuous exercise)

Health Impacts of Cold Weather

Mortality is significantly higher during the winter months in the UK (December to March) when compared to other seasons. On average there are around 35,000 excess winter deaths (EWDs) each year in England and Wales, but this does tend to fluctuate, sometimes by a large amount.

There is a strong evidence-base on the risk to health from cold weather and about the effects of cold weather on health being predictable and mostly preventable. Cold temperatures and winter weather have direct and indirect effects on health.

Direct effects are:

- heart attack
- stroke
- respiratory disease
- influenza
- falls and injuries
- hypothermia

Indirect effects are:

- snow and ice causing disruption to healthcare services
- cold homes and fuel poverty which are linked with poor mental health and social isolation
- reduced education and employment success
- carbon-monoxide poisoning

There are many reasons for the increased risk of ill-health in cold weather. These include:

- higher frequency of circulating infectious diseases, such as flu and norovirus during the winter months

OFFICIAL

APPENDIX 5: COMMUNITY LIVING ROOMS

Information about how to search for community living rooms across the borough should be communicated along with the various public health communication messages in Appendix 2.

COMMUNITY LIVING ROOMS NETWORK

As part of the councils ongoing response to the cost-of-living emergency and to build on the success of the Winter Spaces Network, we are continuing our partnership approach with the voluntary and community sector to ensure that effective place-based support is available to residents across the borough throughout the whole year.

The Community Living Rooms Network is a collection of free to access, friendly community spaces across the borough where residents can relax in public, encounter familiar faces and make new acquaintances.

In the Summer and Winter, these spaces also provide a place for residents to go to get out of the hot or cold weather.

You can find out more about where the community living rooms are and what events are taking place by following the link <https://www.walthamforest.gov.uk/get-involved/community-living-rooms-network-accessible>.

An interactive map of all the venues that are part of the community living room network can be found here: <https://www.walthamforest.gov.uk/get-involved/community-living-rooms>

WHAT ARE COOL SPACES?

Cool Spaces are areas where people can take respite on hot days.

Cool Spaces are designated based on a set of criteria with three different tiers depending on the number of amenities offered. The tiered approach provides Londoners with a better understanding of what can be expected from spaces within the network and how certain spaces can better fit their needs. The criteria also help provide clarity and guidance for organisations wishing to register sites for Cool Spaces.

COOL SPACES IN WALTHAM FOREST

For a list of cool spaces and associated amenities available in Waltham Forest, use the interactive map on the Mayor of London website: <https://www.london.gov.uk/what-we-do/environment/climate-change/climate-adaptation/cool-spaces>

OFFICIAL

SUGGEST A COOL SPACE

Cool Spaces are suggested by boroughs, community groups, faith-based groups, cultural organisations and others, and then validated based on the criteria in the information document below. Some areas of London might be less well covered because Cool Spaces rely on submissions from organisations.

If you would like to register a site, you can do so at the following address:

<https://apps.london.gov.uk/cool-spaces-registration/#/>. Your submission will be reviewed and included in the next update of the map.

OFFICIAL

APPENDIX 6: SEVERE WEATHER SITUATION REPORT - SITREP

The link to the online form will be circulated following a Yellow or Amber alert by the Public Health responsible officer(s) to lead/deputy action card holders. Action card holders will need to appoint a member of their team to fill in the online form and submit by the deadline stipulated by the Public Health responsible officer(s).

Heatwave SITREP Survey

You can complete the heatwave SITREP form online via this link:

APPENDIX 7: Hot weather action cards

OFFICIAL

ACTION CARD 1 – PUBLIC HEALTH

RESPONSIBLE OFFICER(S)

Director of Public Health
Public Health Consultant
Public Health Strategist(s)

RESPONSIBILITIES

- Ensure that Heatwave plan is up to date
- Ensure that key staff receive Weather-Health alerts
- Lead the Council's response
- Seek assurances that Council services are taking the actions outlined in this plan
- Seek assurances that resilience partners are prepared for heatwave impacts
- Monitor the impact of any heatwave on the Borough
- Provide strategic guidance to Directors and Chief Executive (if severity of heatwave requires it)
- Coordinate identification of vulnerable persons with other agencies

ACTIONS

Alert Level	Actions to be taken
GREEN (preparedness)	<ul style="list-style-type: none">• Ensure the Heatwave plan is up to date• Ensure that appropriate Council staff are signed up to and receive Weather-Health alerts• Ensure the hot weather distribution list is up to date and includes representatives from all services listed in the action cards and also Borough Resilience Forum partners• Ensure that template public health messages reflect the latest national guidance• Distribute latest copy of plan to all appropriate Council staff and partners and ensure they are aware of their actions around hot weather• Ensure current public health messages for heatwaves are reflected in Council's business continuity plan.• Ensure that hot weather considerations are included within Council business continuity plans• Provide advice to relevant leads and services as per action cards below• Ensure that Communications have copies of public health messages relevant to different levels of Heat alert and have plans in place to send these out internally and externally• Confirm that multi-agency arrangements for identification of the vulnerable are up to date

OFFICIAL

YELLOW (response)	<ul style="list-style-type: none"> • Consider if Director of Public Health needs to lead as Council Silver (80% chance of reaching Amber alert) • Ask Council services to confirm they are implementing plan via SITREP (80% likelihood of reaching Amber) • Ensure that staff are warned and given public health advice. Available at: Stay well in the heat London Borough of Waltham Forest • Ask Council services to confirm they are prepared to implement plan • Discuss with Adult Social Care the possibility of personalised support • Discuss with DPH and Adult Social Care the need for ‘frontline’ staff to help identify vulnerable individuals • Ask partner agencies to prepare to share information on vulnerable
AMBER (enhanced response)	<ul style="list-style-type: none"> • Act as Council Silver, advised by Public Health responsible officer(s) • Hold heatwave activation meeting • Ask Council services to confirm they are implementing this plan via SITREP • If appropriate, ask ‘frontline’ services to identify vulnerable residents • Provide strategic guidance to Directors and Chief Executive • Request information on vulnerable residents from partner agencies • Seek assurances that resilience partners are responding appropriately to mitigate the impact of the hot weather • Monitor heat-related morbidity and mortality in the borough <p>When Level 3/4 is prolonged:</p> <ul style="list-style-type: none"> • Hold heatwave response meeting and where assurance has not been ascertained, invite action card holders to a further meeting to provide updates on actions undertaken and issues arising, continuing daily until exiting level 3/4

ACTION CARD 5 – HOUSING (INC. ROUGH SLEEPERS & THOSE IN TEMPORARY ACCOMMODATION)

RESPONSIBLE OFFICER(S)

Corporate Director of Housing
Divisional Director of Housing Operations and Assets
Head of Housing Strategy
Interim Director of Housing Options and Homelessness
Strategic Housing Project Manager
Housing Strategy Officer
Operations Manager
Rough Sleeper Coordinator

RESPONSIBILITIES

- Protect Waltham Forest residents and their homes from the effects of hot weather/heatwaves
- An added focus on protecting the vulnerable residents or those who are in sheltered housing, temporary accommodation or who are sleeping rough
- Ensure Severe Weather Emergency Protocol (SWEP) is reviewed and ready to activate
- Where required, to activate SWEP and support individuals sleeping rough to access an offer of emergency accommodation during the SWEP period

ACTIONS

Alert Level	Actions to be taken
GREEN (preparedness)	Rough Sleepers & those in Temporary Accommodation: <ul style="list-style-type: none">• Ensure key housing staff are signed up to receive Weather-Health alerts (contact edward.stagg@walthamforest.gov.uk if you are not sure how to do this)• Ensure housing staff are aware of the Severe Weather plan and their roles and responsibilities in response to Weather-Health alerts• Ensure housing business continuity plans are up to date, including consideration of hot weather and are shared with key staff• Be assured that commissioned housing providers have included consideration of hot weather/heatwaves as part of their routine business continuity plans• Ensure housing staff are aware of public health messages around hot weather and how they can support tenants and customers to stay cool. This includes staff who visit people in their own homes. Public health messages are available here and also on the Council's website• Work with the communications team to ensure that communications to Waltham Forest residents include advice about how to keep their homes cool during Summer and what residents can do if they are struggling to do so. Advice around how to keep homes cool is available here• Ensure housing staff are aware of the risks of severe hot weather, who is most at risk and how to respond when tenant or customer is unwell

OFFICIAL

- Ensure housing staff are aware of [community living rooms](#) & [cool spaces](#) available across the borough and how tenants and customer can access these.
- Consider putting up UKHSA 'Beat the Heat' posters in communal settings to remind tenants how to stay safe during hot weather. Available [here](#)
- Ensure that agencies who also come into contact with residents and service users e.g. Tenant Management organisations, customer resolution service, Citizens Advice Bureau are aware of the public health messages to mitigate the impact of hot weather on service users and residents and that plans are in place to share these
- Ensure that plans are in place to support tenants and customers to maintain a "reasonable" temperature in their property during severe hot weather. Ensure staff are aware of these plans. *This could include checking room temperatures where disabled or vulnerable service users spend most of their time. Providing messages to keep rooms well-ventilated, keep curtains drawn over south facing windows, find cooler rooms in the house to sit in.*

Rough Sleeping team:

- Liaise with providers of daytime provisions i.e. day-time shelters to manage health risks related to the hot weather.
- Plan SWEP with relevant partners, both internal and external
- Consider how people will travel to SWEP accommodation and ensure distances and travel costs are not a barrier for accessing the service
- Ensure there are measures in place to support individuals sleeping rough e.g. providing brief advice on measures individuals can take including staying in the shade, accessing cool spaces, providing sunscreen and bottled water where necessary, checking for any signs of heat-related illness and dehydration. Further advice is available [here](#)
- Ensure information provided is available in other languages where required

Residents in Council Housing:

- Ensure consideration of hot weather/heatwaves has been included as part of routine housing business continuity plans and is up to date
- Ensure that 'stay well in the heat' communications to Waltham Forest residents include advice about how to keep their homes cool during summer and promote use of the ['keep cool at home' checklist](#). Communications could be sent out to Tenants & Residents Associations; Estate WhatsApp groups, notice boards and involved resident's database as well as Community Centre users/stakeholders
- Ensure that housing staff are aware of public health messages for service users and residents to minimize the impact of hot weather. This information is available in the local and national heatwave plan and in the UKHSA 'Beat the Heat' guidance.

OFFICIAL

	<ul style="list-style-type: none">• Ensure that agencies who also come into contact with residents and service users e.g. Tenant Management Organisations, customer resolution service, Citizens Advice Bureau are aware of the public health messages to mitigate the impact of hot weather on service users and residents and that plans are in place to share these• Where LBWF is responsible for housing, ensure that plans are in place to support homes to maintain a “reasonable” temperature during severe hot weather. Ensure staff are aware of these plans. This could include checking room temperatures where disabled or vulnerable service users spend most of their time, providing messages to keep rooms well-ventilated, keep curtains drawn over south facing windows, find cooler rooms in the house to sit in.
YELLOW (response)	<p>Rough Sleepers & those in Temporary Accommodation:</p> <ul style="list-style-type: none">• Ensure key housing staff are aware of the forecasted hot weather• Request the activation of commissioned providers’ housing business continuity plans• Ensure housing staff are communicating public health messages to residents around hot weather and how they can support service users to stay cool, how they can keep their own homes cool etc. This includes staff who visit people in their own homes. Public health messages are available here and also on the Council’s website. Advice around how to keep homes cool is available here• Ensure housing staff are sharing details of community living rooms & cool spaces available across the borough and how service users can access these• Ensure that agencies who also come into contact with residents and service users e.g. Tenant Management organisations, customer resolution service, Citizens Advice Bureau are sharing public health messages to mitigate the impact of hot weather on service users and residents• Activate plans to support council tenants and customers living in LBWF housing to maintain their homes at “reasonable” temperatures during hot weather, including ensuring vulnerable people are managing to stay cool. This may only be possible for sheltered housing settings where staff are on-site more regularly• Consider suspending/partially suspending resident activities such as Murals on Estates and gardening projects if weather gets too hot <p>Rough Sleeping team:</p> <ul style="list-style-type: none">• Activate plans to individuals sleeping rough e.g., with brief advice on measures individuals can take including staying in the shade, accessing cool spaces, providing sunscreen and bottled water where necessary. Further advice is available here• Ensure SWEP is ready to be activated and a SWEP a designated coordinator for single point of contact is identified• Monitor temperatures and communicate with relevant partners to ensure provision can be implemented quickly

OFFICIAL

	<ul style="list-style-type: none">• Confirm SWEP plans with relevant partners• Ensure that organisations/staff that may come into contact with people sleeping rough (especially out of hours) are aware of provisions and referral routes <p>Residents in Council Housing:</p> <ul style="list-style-type: none">• Ensure housing staff and projects teams are aware of the heatwave alert• Ensure that housing staff are communicating messages to service users residents about how to keep their homes cool/how to mitigate the impact of hot weather, including encouraging use of the ‘keep cool at home’ checklist where appropriate. This can be done via daily contacts or via other communication channels to Tenants & Residents Associations; Estate WhatsApp groups, notice boards and involved residents database as well as Community Centre users/stakeholders• Ensure that housing staff are sharing public health messages for service users and residents to minimize the impact of hot weather. This information is available in the local and national heatwave plan and in the UKHSA ‘Beat the Heat’ guidance• Ensure that agencies who also come into contact with residents and service users e.g. Tenant Management organisations, customer resolution service, Citizens Advice Bureau are sharing public health messages to mitigate the impact of hot weather on residents• Activate business continuity arrangements and emergency plans as required• Activate plans to support those living in LBWF housing to maintain their homes at “reasonable temperatures’ during hot weather, as appropriate, including ensuring vulnerable people are managing to cool their home/stay cool• Encourage staff to consider postponing/rearranging visits to cooler parts of the day (or different days)• Consider holding outdoor consultation meetings indoors (if it is cooler than outside) or in cool/shaded areas• Consider suspending/partially suspending activities such as Murals on Estates and gardening projects if weather gets too hot
<p>AMBER (enhanced response)</p>	<p>Rough Sleepers & those in Temporary Accommodation:</p> <ul style="list-style-type: none">• Ensure commissioned providers’ housing business continuity plans continue to be activated as required• Ensure housing staff continue to communicate public health messages to residents around hot weather and how they can support service users to stay cool, how they can keep their own homes cool etc. This includes staff who visit people in their own homes. Public health messages are available here and also on the Council’s website. Advice around how to keep homes cool is available here• Ensure housing staff continue to share details of community living rooms & cool spaces available across the borough and how service users can access these

OFFICIAL

- Ensure that agencies who also come into contact with residents and service users e.g. Tenant Management organisations, customer resolution service, Citizens Advice Bureau continue to share public health messages to mitigate the impact of hot weather on service users and residents
- Continue to support those living in LBWF housing and temporary accommodation to maintain their homes at “reasonable” temperatures during hot weather, including ensuring vulnerable people are managing to stay cool. This may only be possible for sheltered housing settings where staff are on-site more regularly
- Encourage staff to postpone/rearrange visits to cooler parts of the day (or different days)
- Suspend/partially suspend resident activities such as Murals on Estates and gardening projects if weather gets too hot

Rough Sleeping team:

- Continue to support individuals sleeping rough e.g. providing brief advice on measures individuals can take including staying in the shade, accessing cool spaces, providing sunscreen and bottled water where necessary. Further advice is available [here](#)
- Ensure SWEP is activated and night shelter has beds available
- Ensure key partners are undertaking appropriate action in response to alerts as part of the SWEP, as well as regular communications and updated with partner agencies
- Encourage partnership working between police and outreach services in order to identify and support individuals in need, and make them aware of the SWEP offers
- Encourage multi-agency communication daily between partners to coordinate SWEP to increase accessibility of provision- this could be daily email and phone calls about activation and options available

If heatwave is prolonged:

- Contact housing associations across the borough who also provide social housing to check how the hot weather is impacting residents, to get an update as to whether they are aware of guidance and actions to mitigate the impact of hot weather

Residents in Council Housing:

- Continue to implement actions as per Yellow alert, including continuing to communicate public health messages to service users and residents via the previously mentioned channels
- Ensure that agencies who also come into contact with residents e.g. Tenant Management organisations, customer resolution service, Citizens Advice Bureau are continuing to share public health messages to mitigate the impact of hot weather on service users and residents
- Ensure continuity arrangements are being enacted as appropriate (including by commissioned housing services)

OFFICIAL

ACTION CARD 6 – COUNCIL COMMISSIONED SERVICES

RESPONSIBLE OFFICER(S)

Director of Integrated Commissioning

Supplier Quality Manager

Placement Manager

Assistant Director for Integrated Commissioning

Supplier Quality Officer

Supply Quality Governance Lead

Commissioning and Supplier Relationship Managers: Homecare manager; LD and MH Residential Manager; Children’s Manager; Supported Living Manager; Older People Manager

RESPONSIBILITIES

- To ensure commissioned services/service providers are aware of cold weather alerts, the cold weather plan and their responsibilities in response to cold weather alerts
- To seek assurance from commissioned services/service providers about actions being taken to minimise the impact of cold weather on their clients / customers.
- To share action cards with provider staff (preferably provider managers) and ensure that they lead the response for their individual service and undertake actions outlined in this plan to minimise risk to service users

SETTINGS

Settings include all commissioned services (older, working-age and young people) as well as services where the Council has a legal duty of care because the settings are in LBWF

ACTIONS

Alert Level	Actions to be taken
GREEN (preparedness)	<p>Commissioner/Action Card holder:</p> <ul style="list-style-type: none">• Ensure commissioned services are aware of the Severe Weather plan and their responsibilities in this action card• Seek assurance that commissioned services have the arrangements in place below• Share this action card with service managers of commissioned services• Be assured that commissioned housing providers have included consideration of hot weather as part of their routine business continuity plans• Share information with service managers about how residents can access community living rooms & cool spaces available across the borough. <p>Commissioned services:</p> <ul style="list-style-type: none">• Ensure key service staff are signed up for the Weather-Health alerts (contact edward.stagg@walthamforest.gov.uk if you are not sure how to do this)• Ensure frontline staff are aware of the Severe Weather plan and their roles and responsibilities in response to Weather-Health alerts

OFFICIAL

- Ensure social care business continuity plans are up to date, include consideration of heatwaves and are shared with staff
- Ensure staff are aware of the risks of severe hot weather, who is most at risk and how to respond when a service user is unwell
- Ensure staff are aware of public health messages around hot weather and how they can support service users to stay cool. This includes staff who visit people in their own homes. Public health messages are available on the [Council's website](#). Specific messages for staff supporting vulnerable people are available in the following guidance documents: [social care managers](#), [healthcare professionals](#), [those supporting rough sleepers](#) and [those supporting children](#)
- Ensure social care staff are aware of [community living rooms](#) & [cool spaces](#) available across the borough and how service users and families can access these.
- Consider putting up UKHSA 'Beat the Heat' posters around settings to remind staff and service users how to stay safe during hot weather. Available [here](#).
- Ensure there are measures in place to identify and support vulnerable service users e.g. share advice on measures individuals and carers can take to keep cool, implement measures to keep buildings cool, provide supplies to help keep service users cool, share advice on how to correctly store medications, share advice on the signs and symptoms of heat-related illness and what to do if you feel unwell. Advice available in the following guidance documents: [social care managers](#), [healthcare professionals](#), [those supporting rough sleepers](#) and [those supporting children](#)
- Ensure plans to keep buildings cool are in place and fit for purpose

OFFICIAL

**YELLOW
(response)**

Commissioner/Action Card holder:

- Ensure that commissioned services are undertaking actions in this action card
- Continue to share information with service managers about how residents can access community living rooms & cool spaces available across the borough and how service users can access these
- Feedback any concerns raised by service managers to the appropriate leads in adult and/or children's social care

Commissioned services:

- Ensure key staff are aware of the forecasted hot weather
- Ensure staff are sharing news of the forecast with social care users
- Ensure front line staff are disseminating public health messages around hot weather and how people can stay cool and safe to service users
- Ensure business continuity plans are enacted, where appropriate
- Ensure staff are sharing details of community living rooms, cool spaces and other support available across the borough with service users and families
- Identify vulnerable service users and provide package of support to them where required e.g. share advice on measures individuals and carers can take to keep cool, provide supplies to help keep social care users cool, implement measures to keep social care settings cool, share advice on how to correctly store medications, share advice on the signs and symptoms of heat-related illness and what to do if you feel unwell.
- Ensure indoor temperatures remain cool
- Where necessary, staff should review service users/residents care plans and adapt these in light of any additional risk posed by the heatwave, making note of any additional users that may be particularly vulnerable and/or socially isolated. Further discussion should take place on the possibility of personalised support and additional welfare checks for some individuals as required
- Where requested, provide assurance to commissioners about what actions you are taking to mitigate the impact of the hot weather on service users
- Discuss with your commissioning lead any concerns you foresee in your ability to implement the plan i.e. re: provision of supplies to service users

months. This information is available on the council's [cost of living webpage](#).

- Ensure housing staff are aware of information about how tenants can access warm spaces available across the borough. Info. available at: <https://www.walthamforest.gov.uk/get-involved/winter-spaces-network>

Rough sleeping team:

- Ensure relevant staff are signed up to receive cold weather alerts (sign up [here](#))
- Ensure that relevant staff are aware of public health messages for service users to minimise the impact of cold weather. Available: <https://www.walthamforest.gov.uk/health-and-wellbeing/stay-well/winter-wellness-stay-healthy-winter>
- Liaise with providers of emergency shelter for homeless people to agree plans for severe weather and ensure capacity to scale-up provision
- Liaise with providers of daytime provisions i.e. day-time shelters to manage health risks related to the cold weather. Review and map existing day services and their opening times, as well as identify any services that could extend their SWEP into daytime if required.
- Plan SWEP with relevant partners i.e. LA housing teams, outreach workers, day centers, policy and community safety, faith community groups and homelessness charities (e.g., St Mungo's).
- Work with registered providers to find accommodation for those accepting SWEP
- Consider how people will travel to SWEP or other emergency provision and ensure distances and travel costs are not a barrier for accessing the service
- Ensure that partnership plans are in place for emergency shelter of homeless people during periods of extreme cold weather
- Ensure staff are aware of information about services which vulnerable service users/families can access during the winter months. This information is available on the council's [cost of living webpage](#).
- Ensure staff are aware of warm spaces available across the borough and how service users can access these. Info. available at: <https://www.walthamforest.gov.uk/get-involved/winter-spaces-network>

Temporary accommodation:

- Ensure relevant staff are signed up to receive cold weather alerts (sign up [here](#))
- Ensure that relevant staff are aware of public health messages for service users to minimise the impact of cold weather. Available:
